Fly, 1664.

Of the Eclipses this Yeare, 1664.

THere will be foure Belipses this yeare, two of the Sun and two of the Moone, but of these 4. we in England shal only see the one of them which is a great Ealipse of the Moon. It will be visible to us of *Ln* upon the 27. of Iuly, beginning at 24. m. past 9. a clock at night, and be 29. Min. past 10. it will be totally darkned; the middle of this Eclipse is at 25. min. past 11. The end of totall darknes at 13. min. past 12. but no full recovery of light till 26. min. past one. So that the whole time (from first to last) is 4. houres and 2. minutes.

A description of the 4. Quarters of the Yeare.

The first quarter begins when the Sun enters into the first point of Aries, which will be the 9. day of March, at 6. a clock at night.

The Summer quarter.

Begins at the time when the Sun enters into the first point of Cancer, which will be upon the 10. of Iune, at 9. of the clock in the afternoon.

Autumae quarter.

Begins at the time when the Sun enters into the first point of Libra, which will be upon the 12. day of September, 8. min. past noone.

The Winter quarter.

Begins at the time when the Sun enters into the 1. point of Capricorn, which will be upon the 10. day of Decemb, 47. min. past 11. at night.

Rules concerning Husbandry.

When you would Plant or Graft, consider where the wind bloweth, if it be in the South it is very good for that purpose, but if it be North or East, it is not good.

It is good to Plant or Graft generally the Moon increasing in these signes, *Taurus* or *Aquarius* in the beginning of the Spring, or latter end of Harvest.

Plant trees for continuance, when the Moon is in *Taurus* Leo, or *Aquarius*.

Cut timber to have it sound in *December* or *January*, in the wane of the Moone in *Aquarius* or *Pisces*.

Prune trees and pull off the moss in the month of *Febr.* Plash hedges and Lop trees for *Fewell*, that the heads may the sooner grow again, when the Moone is in *Aries* or *Libra* and in her increase.

Set young *Quicksets*, from *September* to *March*.

Remove young trees in the last quart. of the ☾, when she is in *V.*, *♊*, *♍*; and in these months *Septemb.* *Novem.* *Feb.*

Set vines in *February*, *March* or *September*, specially the Moone in *Aries*, *Libra*, *Scorpio*, in her increase.

Set Rose trees in the midst of *February*, the ☾ increasing.

Cut or prune trees in *March* or *April*, the Moone in *Taurus*, *Virgo* or *Capricorne*.

Gather fruit as Apples, Pears, and the like, at the full ☾, the after noone, the weather being fair and dry.

Cut downe Hay presently after the full of the Moone.

Dung ground to prevent growing of weeds, the Moone increasing.

Sow Carrot-seeds about the end of *February* or the beginning of *March*, the Moon increasing. Also sow Onions and Leekes in *February* or *March*, at the wane of the Moone.

Sow Cucumbers and Melons in *February*, or *March* or *June*, in a hot and faire day.

Sow Parsly, Fennel, and Anniseed in *February* or *March*, at the full of the Moone.

Sow Marjoram, Violets, Tyme, Rosemary and Lavender,
in February, March or April, in the increase of the moone.

Sow Gilbiflowers and Wall-flowers in March or April, in
the old of the moone.

Sow Hyssop and Savory in March when the moone is old.

Sow double Marigolds in February or March, in the in-
crease of the moone.

Shave Sheepe at the increase of the moone.

The best time to Geld cattel the Moone being in Aries.

Sow Rye at Capricorne.

Of Blood-letting, and some other Physicall

Observations.

In Youth let blood from the change to the first quarter, in
middle age, from the first quarter to the full. In Elder yeares
from the full to the last quarter. In old age, from the last quar-
ter to the change.

But knowe, that under the age of 14. and above the age of
36. it is not good to bleed at all.

Again, in the Cancular or Dog Dayes, it is very hurtfull to
take any blood at all, unless there be great need, and indeed
necessary unto no man: therefore in such a case, the distill
being desperate, the cure must be advanced.

Take a purgation when the Moone is in Aries, or Capricorn
aspect, with Venus decreasing in any of these three signes.
Cancer, Scorpio, or Pices, and it will be sure to worke the
better, because when Venus is in Aries, in a right signe with such
